What is “Blow job” or “Fellatio”?

Fellatio fellation,^[1] is oral sex performed upon the penis. It may be performed to induce orgasm and ejaculation of semen, or it can be used as foreplay prior to vaginal or anal forms of intercourse.

Fellatio is commonly referred to as a **blowjob**.^[2] Fellatio is also sometimes referred to as “giving head” or “going down.”^[3] Other terms include “sucking dick” and “sucking off.”

ADVANTAGE OF BLOWJOB

Fellatio is sometimes practiced during pregnancy as a replacement for vaginal sex by couples looking to engage in a sexually pleasurable activity while avoiding the difficulty of vaginal intercourse during the later stages of pregnancy.^[4]

SAFE SEX – NO PREGNANCY ^[5]

Fellatio does not cause pregnancy; there is no way for sperm from the penis to enter the uterus and fallopian tubes to fertilize an egg. In humans, there is no connection between the gastrointestinal system and the reproductive tract. Sperm is killed and broken down by acid in the stomach and proteins in the small intestine.
